# Robert Manning Photographer

1979-1990

*(Excerpts from Curriculum Vitae)*

"In 1979 Robert Manning graduated from a 2 year program in professional photography with the 'School of Modern Photography' (Certified Professional Photographer-Commissioner of Education), and served apprenticeships in professional studios in the Vancouver area. In 1980 he started his studio in Vancouver, specializing in contemporary portraiture for models, actors, and people in the entertainment profession. He has promoted portfolios to elite agencies in New York, Los Angeles and France.

Photography representation (Image Finders Agency), included international accounts in Vancouver, Toronto, New York, London, Paris, and Tokyo. International and group exhibitions include, Vancouver, Santa Monica, Las Vegas, St. Louis, New York, Sacramento, Washington, Kenosha, Durban, Penang, Singapore, Salt Lake City, and New South Wales.

From my speculation , I have gained the impression that Robert Manning is an outstanding Professional Photographer with additional specialties in unique forms of photographic presentation"

*W.A. MacDonald A.P.R. Writer for Outdoor Publications, Films, Lectures, Radio & T.V.*

"Robert Manning is a West Coast Artist who can't draw, can't sketch, and would probably have trouble painting a barn door properly. But give the man a camera, and he will produce works of art that take top awards in major juried group exhibitions from here to New York, New York." He is a professional photographic artist dedicated to creative excellence!"

*Arlie Straw, Assistant Editor, Easy Living Magazine*

"Mr. Manning was recommended to us as being much more than a Photographer, but rather an "artist with a camera". The series of photographs we have just received is proof of that statement. We will be using them in several international publications as well as presenting them in a pictorial report at our Annual National Convention in Seattle. He has fulfilled our every specification and exceeded our expectations. We wish to express our thanks to Mr. Manning for this exquisite photo coverage"

*Paddy Culhane N.A.M.E., Regional Coordinator, Canada Region North*

"Manning's love affair with the lens started back in 1975 when the stocky blonde twenty-one-year-old bought his first 35mm camera, and discovered they were made for each other. Courses in photography and some stints working for local studios sharpened his technique, but the world he sees through the eye of the camera is uniquely and beautifully his own"
